Existing Meter Information (EMI) Form Overview

The EMI was developed by the ACC Process Standardization Working Group (PSWG) and is subject to change based on future work by the PSWG.

This form will be used by the UDC to communicate existing meter attributes to the designated ESP and MSP. The EMI contains information about the existing meter at the site. For sites that have more than one meter, a separate EMI will be provided for each meter.

General Information

- 1. The timing requirements covered in this document are based on business days. The day of the event is considered day zero and days from that event are to be counted + or from the day of the event.
- 2. The EMI will be sent within 5 business days of receiving the DASR acceptance notification pending meter exchange. **Example**: "5 business days of receiving the DASR acceptance notification pending meter exchange" = DASR notification took place on December 4, 2000, the EMI must be sent no later than the end of business on December 11, 2000.
- 3. Site Meet Required? (field 12) A "Yes" value indicates that the UDC must meet the MSP at the site for the installation. The MSP and UDC must mutually agree upon site meet schedule dates and times.
- 4. Equip Purchase Auth (EPA)(field 15) A "Yes" value indicates an Equipment Purchase Authorization form will be sent as an attachment to the EMI. The EPA will list equipment related to the site for sale. The ESP sends the UN-signed EPA form back to the UDC within 5 business days prior to the exchange. This will be considered intent to purchase the equipment or not to purchase.
- 5. The EMI form will be e-mailed as an Excel worksheet. The maximum number of EMI's to a worksheet is twenty (20).
- 6. There are 2 versions of the EMI available for use, they are:
 - EMI V1 enter information on each individual form, which will link to a spread sheet view only
 version. Do not change any information on the spreadsheet in this version, as the information will
 not bridge to the individual form.
 - 2. EMI V1SS enter information on the spreadsheet, which will link to individual **view only** version of the forms. Do **not** change any information on the individual forms in this version, as the information will not bridge to the spreadsheet.
